Tools

VS Code || Github || Vercel

PROJECTS

1. Lifted & Listed

[Live Link](#) || [Front-End](#) || [Back-End](#)

Technologies Used: HTML, CSS, Tailwind CSS, JavaScript, Django REST Framework, PostgreSQL

Features:

This project is a vibrant e-commerce platform where users can buy and sell products easily. List your items for sale, manage your listings, and connect with buyers. Edit or delete your products, track your purchases and sales, and update your account details anytime. Secure email verification ensures a safe experience.

2. Fur Ever Friends

[Live Link](#) || [Front-End](#) || [Back-End](#)

Technologies Used: HTML, CSS, Tailwind CSS, JavaScript, Django REST Framework, PostgreSQL

Features:

This project is a dynamic pet adoption website designed to streamline the adoption process. It features secure user registration and authentication, personalized user experiences, and detailed pet profiles with photos and descriptions. Users can search for pets by breed, and can also list pets for adoption. Fully responsive, the website offers a seamless experience on desktops, tablets, and smartphones.

3. Boi Poka

[Live Link](#) || [Github Link](#)

Technologies Used: HTML, CSS, Tailwind CSS, Django , PostgreSQL, MVT Design Pattern

Features:

Boi Poka is a comprehensive library management platform where users can borrow books and review the ones they've read. Manage your borrowed books, securely deposit money into your account, and view detailed transaction reports. With user-friendly features and a secure environment, Book Haven ensures a seamless and enjoyable library experience for all.

EDUCATION

B.Sc in Computer Science & Engineering

City University, Bangladesh
DEC – 2022 - Ongoing
CGPA : 3.92/4.00

EXTRACURRICULAR ACTIVITES

Organizing Secretary

Competitive Programming Camp City University

ACHIEVEMENTS

Solved **1000+** Problems on Online Judges
Pupil rank at Codeforces
3 Star at Codechef
